- Web, Cloud, and cellular connectivity
- Push notifications
- Multiple user privileges
- Irrigation controllers analytics
- Multi language support

GreenField App dashboard - Desktop view

Munters GreenField App, an advanced app used to connect to Munters GreenField or GreenField ECO controllers, enables full management over the irrigation and fertigation operations.

The remote management of the irrigation and fertigation controllers has never been made so easy and intuitive, with dashboard, hot keys, and visuals.

GreenField App includes different access level by accounts: view only, partial access, full access or administrator.

GreenField App can work even without internet access by simply plugging a display or monitor directly into a Munters Green Comm-Box, which is connected to the controller.

In the unfortunate case of errors, Munters GreenField App features a rich diagnostic package that makes troubleshooting an easy task.
