Munters service kits

For ML series dehumidifiers*

Benefits

- All parts needed to keep your equipment running optimally over time
- Tested and validated by Munters to ensure optimal performance
- High genuine quality for every single part
- Increased productivity with less time for repairs
- Minimize downtime risk by having critical spare parts on hand
- Integrated into Munters Preventative Maintenance plan
- Pre-assembled components save time during on-site replacement

Based on our more than 60 years of experience in climate control Munters has carefully designed service kits that will ensure your ML desiccant dehumidifier keeps operating at peak performance, preventing costly downtime from breakdowns.

In addition to yearly inspections and preventative maintenance, recommended part replacement are performed with the Munters service kits according to the Maintenance plan. Based on years of climate control field experience and knowledge about the unique environments in which our customers operate, we offer several service kits, each designed to address specific needs over the lifetime of our equipment.

Each kit contains all the Munters Genuine Parts needed to service your unit in one convenient package, and our service kits are ready for delivery.

All you need in one kit

Munters has designed and packed a variety of service kits for your ML unit. Preventative maintenance with a service kit ensures all relevant parts are changed simultaneously using high-quality Munters Genuine Parts. Your ML unit can then operate at peak performance, and you can avoid performance drop or even breakdowns. Here are some of the Munters service kits you can choose:

- Safety kit
- Rotating parts kit
- Electrical parts kit
- Rotor parts kit

Maintenance made simple

Munters service kits are part of the preventive maintenance plan in our Service Agreements, but can also be ordered separately and used as critical spare parts. By having these critical spare parts on hand you can minimize risk and avoid unexpected downtime.

Safety kit

You get key components that assure safe operation of your ML. From thermostats to our belt tensioner and brackets, each vital, genuine part replacement secure fail safe. And included sensors detect possible system failures that can impact safety features and damage other vital components.

Rotating parts kit

Every moving part of your ML unit accumulates wear and tear, and it is important to replace these parts. The cooling fan, drive motor and wet air connector are just some of the carefully selected genuine spare parts in the Rotating parts kit that ensure your unit operates at peak performance and does not break down. Did you know that included fans are preassembled to save time during on-site maintenance visits?

Electrical parts kit

Key electrical components such as circuit breakers, auxiliary contacts and trip coils wear out over many years of high current exposure and these critical components need to be replaced by the genuine spare parts in the Electrical parts kit to ensure safe operations.

Rotor parts kit

In the Munters Preventive Maintenance plan the efficiency of the rotor is measured to ensure capacity is kept at a high level. When it's time for replacement, the Rotor part kit includes the rotor cassette and flexible connections to enable risk-free replacement.

* Munters service kits can be used with: ML180, ML270, MLT350, ML420, ML690, ML1100, ML1350, MLT800, and MLT1400.

Which spare parts are included in a service kit depends on the product model.
