MUNTERS WINS ENERGY INNOVATION AWARD

Munters (MTRS) received the “Industry Energy Innovation” award at the 2017 Europe Datacloud Awards.

BroadGroup announced the winners of this year's Datacloud Awards, showcasing innovation, inspiration and excellence in data center and cloud.

“We are proud to receive this recognition for our innovation and commitment to energy efficient solutions within the data center industry. Our teams are dedicated to working with data center owners and operators to achieve energy goals whilst offering an innovative edge. The Oasis™ Indirect Evaporative Cooling technology was submitted and the star of our energy efficiency offering for this award.” says Neil Yule, President, Data Centre Business Area, Munters.

The awards were presented on the evening of 6th June in the Monaco Sporting Club and the ceremony was attended by over 600 executives from the data center and cloud industry. Entries were judged across a range of award categories.

About Oasis™

Oasis™ Indirect Evaporative Cooler uses the widest array of heat exchangers in the market for indirect evaporative cooling. The most innovative of these heat exchangers is Munters patented Oasis™ Evaporative Polymer Exchanger (EPX). This heat exchanger uses a unique polymer tube that is suitable for use in all types of water quality environments.

The Oasis™ Indirect Evaporative Cooling product line can significantly reduce refrigeration capacity in virtually all climates, which is not true of conventional direct air-side economisers or wet-bulb economiser installations. These products are used to maximise energy savings for customers.
