

Get better control of your
ML3* dehumidifier

ML3* control conversion to Climatix

* This conversion kit is designed for ML17, ML23 and MLT30 units made between 2005–2015.

ML3 control conversion to Climatix

Extend the lifetime of your ML3 dehumidifier with a new Climatix control

If you own a ML3 dehumidifier* manufactured between 2005–2015, Munters suggests you take preventative action and convert your well-functioning ML3 dehumidifier with a new Climatix controller.

The equipped ACD/ICD controller is obsolete, and no one-on-one replacement is available if it breaks down. To best service these units and extend their lifetime, Munters recommends that you convert your control system with our Climatix conversion kit.

Tailor-made to fit your ML3 unit*, the Climatix controller will extend its lifetime. And you'll get the latest Munters control unit on the market, which features an easy-to-use interface with multiple language options, just like the current ML3 units in production. This modern control system is more energy-efficient, and it complies with the original CE marking on the unit.

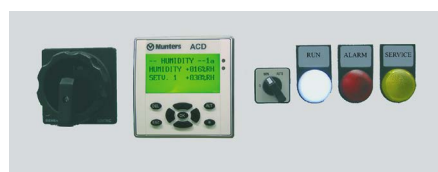

Our specially trained service engineers can convert ML3 units* in only one day. But since we tailor each conversion kit to the specific needs of our customers, please plan for this conversion to ensure uninterrupted operations.

With decades of experience leading the dehumidification industry, we know what it takes to ensure the perfect climate for our customers. Trust Munters, convert today to keep your ML3 unit running like new!

* This conversion kit is designed for ML17, ML23 and MLT30 units made between 2005–2015.

The new Climatix controller used in the kit has an easy-to-use interface, while keeping its original CE marking on the unit.

The equipped ACD/ICD controller on ML17, ML23 and MLT30 dehumidifiers made between 2005–2015 is obsolete.

Climatix benefits

- Automatic modulation to ensure optimized energy efficiency
- Easy-to-use software system with readout of all settings and alarms
- Future software updates will keep your equipment on the cutting edge
- Scheduled maintenance notifications
- Modern communication capabilities

Conversion benefits

- Avoid unplanned downtime
- Get the latest, best-in-class control system
- Improve ML3 unit's energy efficiency and control
- Munters certified quality
- Minimized downtime during conversion
- Complete kit with new front panel and built-in HMI
- Compatible with Munters Connected Climate
- Built-in alarm system
