

Munters GLASdek[®] GX40

Premium evaporative media

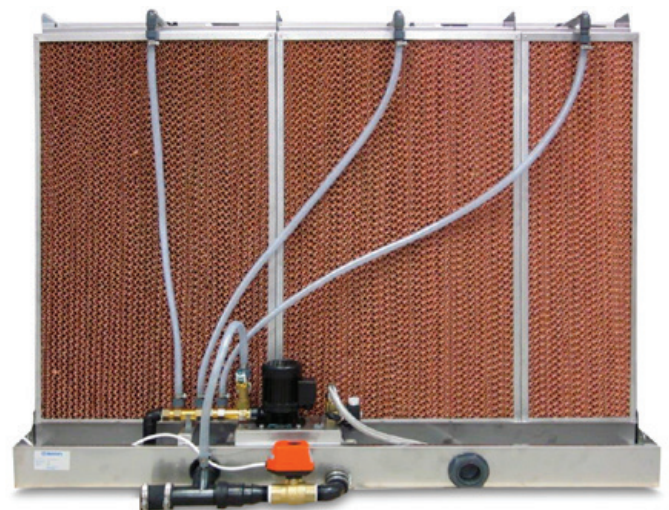

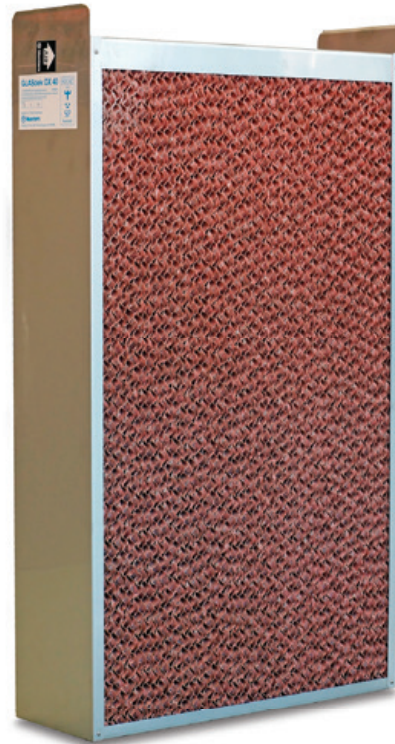

Munters is the original inventor of structured media, proven and produced for over 50 years.

Benefits

- Evaporative media made from inorganic, fire-rated, ceramic material
- High-efficiency performance: 95%
- High tolerance for pH levels in water
- GREENGUARD Gold Certified

GLASdek GX40 is a high-efficiency evaporative cooling media that is engineered to provide maximum cooling and humidification, low pressure drop and years of reliable service. The media is made from inorganic, fire-rated material.

GLASdek GX40 allows for the use of water straight from the tap. No need for demineralization plants. No need for silver ionization treatment. In cases with non-sufficient water quality, it may be necessary to add water treatment. Minerals and pollutants stay behind in the GX40 evaporative media to be washed away with the discharge water thereby keeping the total humidification process pure. Easily installed modular cassette design makes servicing and replacement quick and efficient.

GX40 media assembled in Munters FA6 humidifier.

Munters GLASdek[®] GX40

Premium evaporative media

Tested and classified

The inorganic material GLASdek GX40 has been fire tested and classified as non-combustible material according to EN ISO 1182. Fire Rated UL[®] 900 and ULC-S111 Class 1. RoHs compliant. Tested against the transfer of Legionella (with contaminated water and air born bacteria) by external body. Certified for hygiene (no aerosols containing bacteria or Legionella) at the University of Aachen, Germany by PD Dr. Med. Sebastian W. Lemmen.

Applications

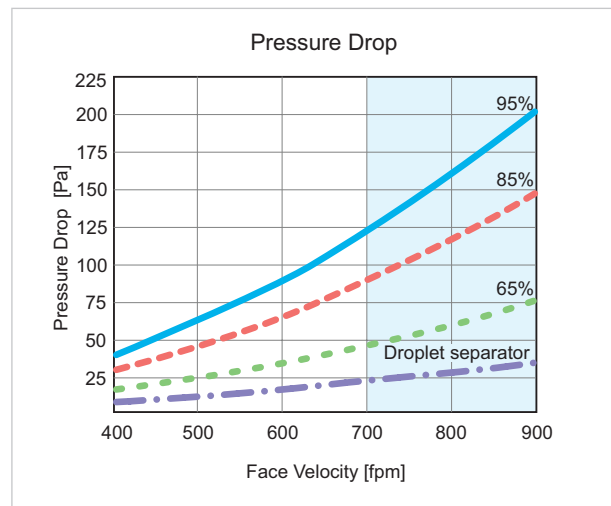

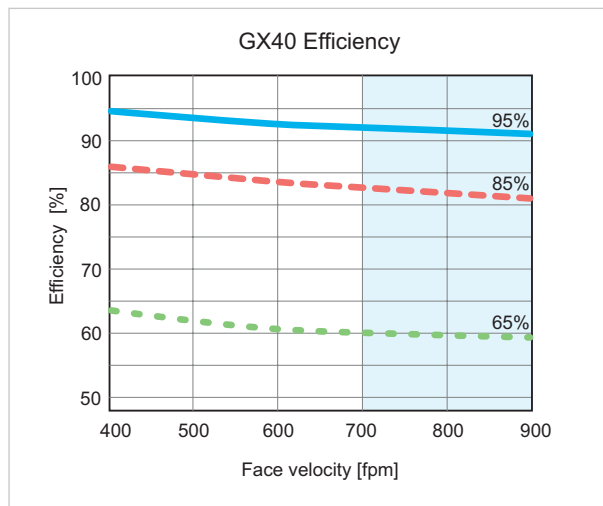

- Evaporative cooling
- Data centers
- Commercial cooling
- Industrial cooling
- Textile
- Electronics

GREENGUARD Gold

Munters high-performance media is GREENGUARD Gold certified and has been tested for emissions from over 360 individual chemicals of concern, guaranteeing them as having non-harmful emissions. Read more on www.munters.com/greenguard.
