

Munters GreenField App

Controller accessibility

Munters GreenField App takes the management of Munters GreenField and GreenField ECO controllers to the next level: anywhere, anytime from any device.

Benefits

- 24/7 access to irrigation controllers
- Simple and enhanced user experience
- Web, Cloud, and cellular connectivity
- Push notifications
- Multiple user privileges
- Irrigation controllers analytics
- Multi language support

GreenField App dashboard - Desktop view

Munters GreenField App, an advanced app used to connect to Munters GreenField or GreenField ECO controllers, enables full management over the irrigation and fertigation operations.

The remote management of irrigation and fertigation controllers has never been so easy and intuitive, with dashboard, hot keys, and visuals.

GreenField App includes different access levels by accounts: view only, partial access, full access or administrator.

GreenField App can work even without internet access by simply plugging a display or monitor directly into Munters CommBox, which is connected to the controller.

In the unfortunate case of errors, Munters GreenField App features a rich diagnostic package that makes troubleshooting an easy task.

GreenField App is available for iOS and Android by downloading the application RotemNet Web.

Munters CommBox

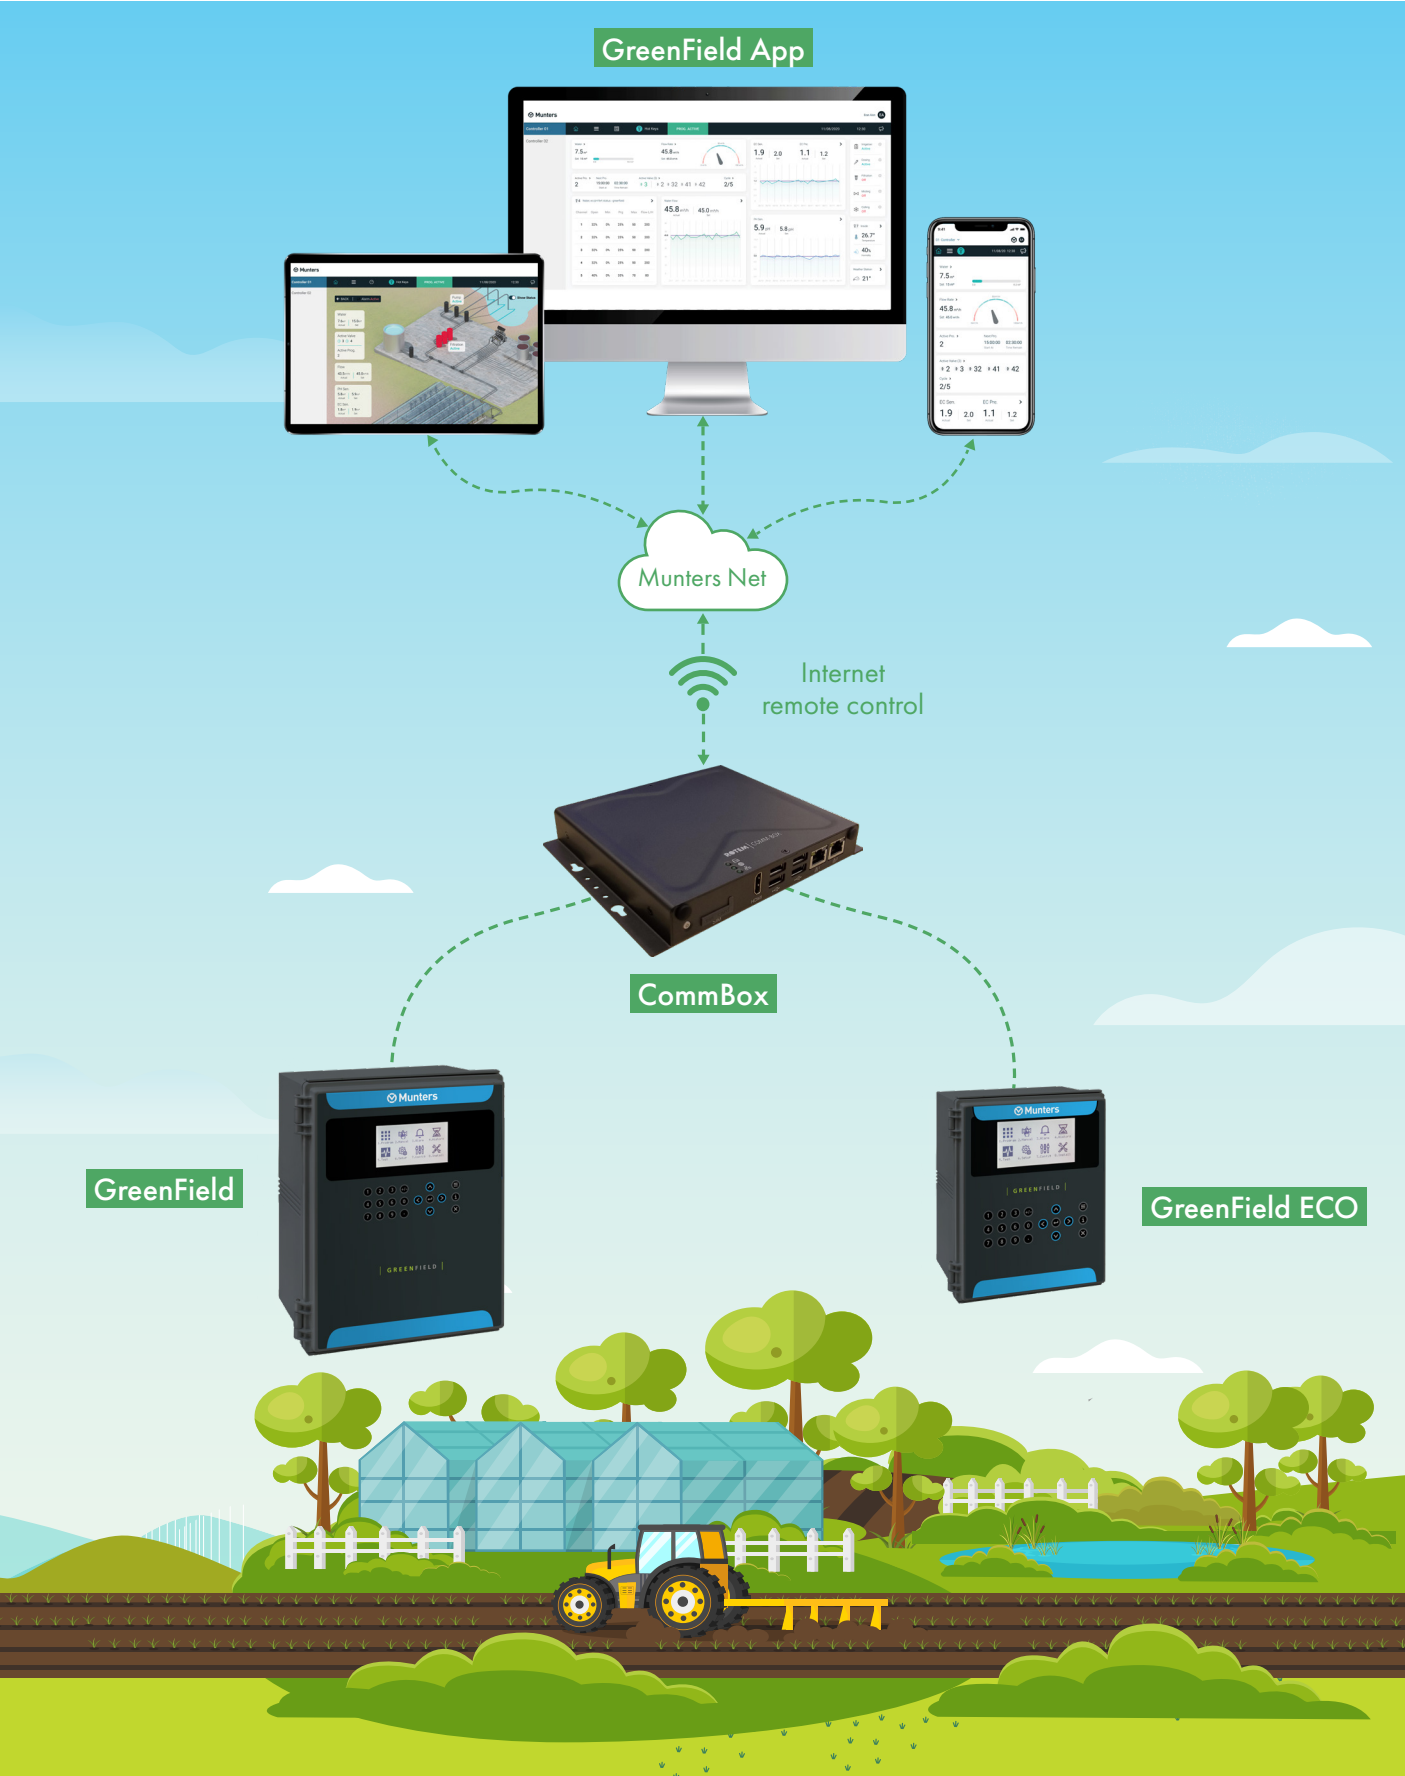

Munters CommBox enables remote access to Munters irrigation and fertigation controllers (GreenField and GreenField ECO) from any computer, tablet or smartphone.

Once the connection to the system is set, the CommBox allows the fertirrigation management through Munters GreenField App.
