

Product sheet  
Rotem One

- Extra large screen is easy to use, simplifies configuration, control and farm monitoring
- Remote access via Web, Cloud, smart-phone and real time alarms
- Improved software capabilities support an unlimited number of devices and scales
- New heavy duty enclosure simplifies installation and maintenance
- Multi-language support

# Rotem One

## Climate Control Taken to a New Level

The Rotem One, the most advanced climate control unit, provides poultry and swine farmers with vastly expanded capabilities.

Featuring all the functionality of Platinum Pro & Touch Controllers, the Rotem One's enlarged 15.6" screen provides an intuitive, easy-to-use interface that brings all the advantages of touch screens to your farm.

Its modular architecture enables a high level of flexibility in its system design, supporting a large number of devices and up to 200 2HP heavy duty relays (including expansion units). Its improved software guarantees successful critical missions, with its smart On/Off/Auto override switches, 16 independent heat zones and precision fogger and evaporative cooling system, failsafe emergency relay and SD card and ARM CPU. Rotem One's enclosure was designed to facilitate installation and maintenance, while a switch guard door keeps toggle switches securely in place.
